61-0096-08 Protective Tube ϕ 10/150mm for Bimetal Thermometer 3304-00

Order No.	61-0096-08
Model No.	3304-00
JAN Code	4974425180301
	JPY: 8,500
	USD: 56.75
Standard price	
	Exchange rate 1USD= 149.78JPY Valid price in Japan
Quantity	1set

Features

- Protective tube for bimetallic thermometer. We recommend the use of "protective tube" in the following cases. ① When a liquid of 50°C or higher is measured (2) When the object to be measured may corrode the temperature sensitive part (3) When pressure is applied to the temperature sensitive part (5 kg/m² or more, case outer diameter Φ 75 2 kg/m² or more) (4) When the object to be measured comes out when the thermometer is removed. It is possible to replace the thermometer without removing the liquid in the boiler, piping, hook, etc.

Spec

- Model number: 3304-00
- Material: Stainless Steel (SUS304)
- Welding type
- Outer screw: R1/2
- Thickness/length (under screw): ϕ 10/150mm
