## Name sticker

Dashed line

TXC

TRC
TXJC

It is possible to set the terminal No. etc. on it. As the partitioning line is printed for TXC type, it is possible to attach it to terminal unit after setting a seal on it, and it is very convenient.

CAUTIONS
1. When you use the one made from fiber (TRC21, TRC11), it is not possible to print with auto printer. Stamp with rubber stamp and apply it with tape.
2. When the number of pins increases, as the TXC type may generate gap because the tolerance is counted, please use it referencing the table below.

Acceptable maximum number of units of sticker with partitioning line

Terminal unit	Number of units
TX 7, TX10S	60
TX10	50
TX20	40
TX30	30
