

Stainless Steel Twin Wheeled Compact Heavy Duty Castors

RoHS compliant products.

POINT

- Bearings and bracket (including balls in swivel head) are made of **stainless steel. (SUS304)**
- Smooth swiveling thanks to **double bearing** in the swivel head with dust shield for balls.
- **Rotates smoothly** after a long-term fixation under a heavy load.
- **Easy to change direction** of swivel castors as twin wheel reduces turning radius of the castor.

USE EXAMPLE

- For fixed precision machines to be occasionally relocated in a workplace, or moved as production line is rearranged.
 - For heavy duty slow-moving carriers.
- ©We'll accept your custom-order. Please feel free to contact us.
(Use "Specification Form for Custom-designed castor" at the end of this catalog.)
©Please feel free to ask about the product weight for each item.

Starting resistance to a right angle is down compared to a single wheeled castor!
