Heat Resistant Temperature: -20 ~ 80°C

- Precautions for Use
- Blocks are equipped with retainers to prevent balls from falling off. For how to handle the blocks, see **F P525**.

- blocks, see
 PS F325.

 **Redal clearanges and accuracies are not guaranteed if the blocks and rails are interchanged from the original set combinations.

 **Straight grooves are provided on datum planes. Be sure to match the datum lines when using.

 **Palis cannot be connected end to end.

 **The accuracy of Linear Guides is guaranteed after mounting the rail (after fastening screws on the rail and pushing it onto the datum plane).

 **Minor bending of the rail will be adjusted after being mounted and will not affect the performance.

- Others

 Filled with Lithium soap based grease (Alvania Grease S2 by Showa Shell Sekiyu K.K).

 Grease Fittings: Straight Type for H24 and Angled Type for H28 and H33.

 Grease Fitting is screw-in type, and thus, can be repositioned.

Lubrication Units

Advantages of Lubrication Unit MX: Provides long term maintenance-free operation.
Reduces maintenance cost. Most suitable
where the design does not allow lubrication.
For details, see **EE P.530**.
