

[High Precision] X-Axis Dovetail Slide, Rack & Pinion Long Stroke (100, 200, 300, 400mm) Block Combination

RoHS10

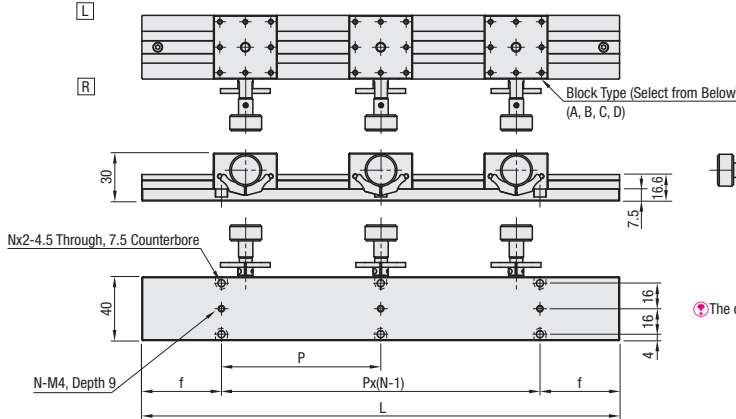

Features: Useable for tooling changes. Numbers, type and direction of blocks and rail length are selectable.

X-Axis, Long Stroke (100, 200, 300, 400mm) Block Combination

Moved distance can be read with the mark on the carriage and the scale on the base. Resolution is 1mm.

XLARGE

The drawing is a XLARGE3-B-B-B

Adhesive vernier scale label can be placed at desired position in accordance with a required adjustment range.

Block Connecting Method

When L (Rail Length) = 100, only one block can be selected.

When L (Rail Length) = 200, two blocks can be selected.

Travel distance of *1 is the value obtained with one block. Addition of every one block shortens the travel distance by 40mm.

*2 M4 (backside) is P=100

*3 Weight of the rail itself. Unit weight should be calculated by adding the weight of the selected number of blocks.
